Matt Florell, President

Subject: Florida U.S. Congressional District 13 Primary Election survey, conducted for SaintPetersBlog.com

Date: October 9, 2013

Executive Summary:

This poll of 810 Florida U.S. Congressional District 13 active voters was conducted on Wednesday, October 9, 2013. This poll used the registered voter lists supplied by the state of Florida as of September 3rd, 2013. The sample of voters that were called included random samples of registered Republican and Democratic voters within the boundaries of the 13th U.S. Congressional District of Florida.

The issues surveyed included questions related to the 2014 primary election.

Methodology:

The poll was conducted by an automated phone call polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the active voter population for Florida U.S. Congressional District 13. The demographics used were: race and age.

The voters polled were chosen at random within the registered Republican and Democratic voter population within Florida U.S. Congressional District 13. Only voters that had voted in both the 2010 and 2012 general elections were included in these results.

The scientific results shown for the Democratic questions below have a sample size of 367 respondents and a Margin of Error of 5.1% at a 95% confidence level.

The scientific results shown for the Republican questions below have a sample size of 443 respondents and a Margin of Error of 4.7% at a 95% confidence level.
