Subject: Florida U.S. Congressional District 13 Special Election survey conducted for SaintPetersBlog.com

Date: December 3, 2013

Executive Summary:

This poll of 1128 Florida U.S. Congressional District 13 active voters was conducted on Tuesday, December 3, 2013. This poll used the registered voter lists supplied by the state of Florida as of October 3rd, 2013. The sample of voters that were called included random samples of registered voters within the boundaries of the 13th U.S. Congressional District of Florida.

The issues surveyed included questions related to the March 2014 special election.

Methodology:

The poll was conducted by an automated phone call polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the active voter population for Florida U.S. Congressional District 13. The demographics used were: political party, race and age.

The voters polled were chosen at random within the registered voter population within Florida U.S. Congressional District 13. Only voters that had voted in both the 2010 and 2012 general elections were included in this survey.

The scientific results shown for the All Voter questions below have a sample size of 1128 respondents and a Margin of Error of 2.9% at a 95% confidence level.

The scientific results shown for the Republican questions below have a sample size of 534 respondents and a Margin of Error of 4.2% at a 95% confidence level.
