**Subject: Florida U.S. Congressional District 13 Special Election survey  
conducted for SaintPetersBlog.com**

**Date: February 25, 2014**

**Executive Summary:**

This poll of 1269 Florida U.S. Congressional District 13 early and active voters was conducted on Tuesday February 25, 2014. This poll used the registered voter lists supplied by the state of Florida as of January 3rd, 2014. The sample of voters that were called included random samples of early and active registered voters within the boundaries of the 13<sup>th</sup> U.S. Congressional District of Florida.

The issues surveyed included questions related to the March 2014 special election.

**Methodology:**

The poll was conducted by an automated phone call polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the early and registered voter population for Florida's U.S. Congressional District 13. The demographics used were: political party, race, age and gender.

The voters polled were chosen at random within the registered voter population within Florida's U.S. Congressional District 13. Only voters that stated they had already voted or were planning to vote in the March special election were included in this survey.

The scientific results shown for the questions below have a sample size of 1269 respondents and a Margin of Error of 2.8% at a 95% confidence level.

Early Voter Respondents: 813

Likely Voter Respondents: 456
