Subject: Florida Registered Voters from 2013 to 2020 Analysis

Date: May 25, 2020

Executive Summary:

This analysis covers the changes in the Florida electorate from January 2013 to April 2020.

The data used includes registered voters in the state of Florida, and their voter histories.

Methodology:

We used the state of Florida public voter files for January of each year(and also April of 2020) to gather the information on new voters, party switchers and removed voters, mail ballot voters and rejected mail ballot voters from year-to-year. Voters were identified by "Voter ID Number" only.

Conclusions:

Political Party Registered Voter Net Change

From 2013 to 2020, the percentage share of registered Democrats and Republicans both went down, with Democrats decreasing at a much faster rate. The major reason for the Democratic share of voter registration decreasing at a faster rate is that even though more Democrats were registered as new voters in every year but 2017, Democratic voters usually switched parties at a faster rate and more Democrats were removed from the voter rolls than Republicans over the 8.25 year study period. The net result of this is that Republicans had a 55% greater net increase in voters than the Democrats over the 8.25 year study period, and 38% of those Democratic Party gains during that period are from only the first 3 months of 2020(right before the Presidential Primary election).

Other Significant Voter Changes

Some other significant changes in the Florida electorate across the 8.25 year study period are an increase in the Hispanic voter share by 3% while the White voter share decreased by 4.2%. The age 70 and older voter share increased by 2.3%, while the below-50 voter share decreased by 2.6%. Looking at Geographic regional changes, they were all below 1% changes in the share, but a trend can be seen of the Miami area decreasing in the share of voters while the I-4 corridor regions of Orlando and Tampa have increased.

2018 Amendment 4 Voter Registration Changes

Looking at the data from after the 2018 Constitutional Amendment 4 went into effect in January 8th, 2019, there appears to be no clear significant benefit for any political party of the increased voter registration of felons who have fulfilled the terms of their sentencing.

Mail Ballots and Rejected Mail Ballots

Republicans have had a consistently greater share of active mail ballot voters than Democrats, although the Democrats have reduced this gap from 4.3% in 2012 to 1.8% in 2018. As for rejected mail ballots, the Democrats have had a consistently growing share every general election year, from Republicans having a 10.8% larger share of rejected ballots in 2012, to the Democrats having a 9.8% larger share in 2018(a 20.6% swing in 8 years).

Appendix: DATA

Newly registered voters:
