**Subject: Florida Congressional District 4 survey conducted for
FloridaPolitics.com**

Date: August 4, 2022

Executive Summary:

This poll of 312 likely Republican Florida Congressional District 4 primary voters was conducted on August 4, 2022. This poll used the registered voter lists supplied by the state of Florida as of July 12, 2022. The sample of voters that were contacted included random samples of registered voters within the new boundaries of Florida's 4th Congressional District.

The issues surveyed included questions related to the August primary election in the new boundaries of Florida's 4th Congressional District.

Methodology:

The poll was conducted through an automated phone call polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the active Republican voter population for the new boundaries of Florida's 4th Congressional District. The weighting demographics used were: race, age and gender.

Voters who had stated that they were not likely to vote in the August primary election were excluded from the results.

The scientific results shown for the questions below have a sample size of 312 and a 5.5% Margin of Error at a 95% confidence level.
