Subject: Florida Statewide survey conducted for FloridaPolitics.com

Date: October 15, 2025

Executive Summary:

This poll of 1,034 likely Florida Republican primary election voters was conducted from October 13-15, 2025. This poll used the registered voter lists supplied by the state of Florida as of September 9, 2025. The sample of voters that were contacted included random samples of registered Republican party voters within the boundaries of the state of Florida.

The issues surveyed included questions related to the 2026 Florida Republican Primary election.

Methodology:

The poll was conducted through a combination of an automated phone call polling system and a manual P2P SMS polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the active Republican voter population for the state of Florida. The weighting demographics used were: race, age, gender and media market.

Only voters that stated they were planning to vote in the 2026 Republican Primary election were included in the results below.

The share of respondents by contact method: Phone call = 79% SMS texting = 21%

The scientific results shown for the questions below have a sample size of 1,034 and a 3.0% Margin of Error at a 95% confidence level.
